719 (PVP)

BEARDLESS TRITICALE

Description

Flex 719 has been a top pick in our trials because it's standability and yield potential. It produces good protein and digestibility with the amount of leaves it has. Swathing it in the boot stage ensures good digestibility and protein values. Good early seedling vigor provides grazing in the fall and winter months. It is a top performer of the silage trials the past three years running.

Suggested Growing Regions

Texas Panhandle, New Mexico, Oklahoma, Midwest and Northeastern US

Primary Uses

- Silage
- Fall & Winter Grazing
- Hay

Maturity & Agronomics

Maturity	Medium
Yield Potential	High
Plant Height	Medium
Winter Hardiness	Favorable
Seeds / lb.	13,000 - 14,000
Planting Rate Irrigated	80 - 100 lbs/acre
Planting Rate Dryland	40 - 60 lbs/acre
Planting Time	August - December 1

Awn Length	3
Plant Height	40 - 50"
Lodging	2
Heading	112 days
Leaf Rust	1

Rating Scale: 1 (Excellent) 10 (Poor)
